

Industrial Cyber Security Embedded Development Services

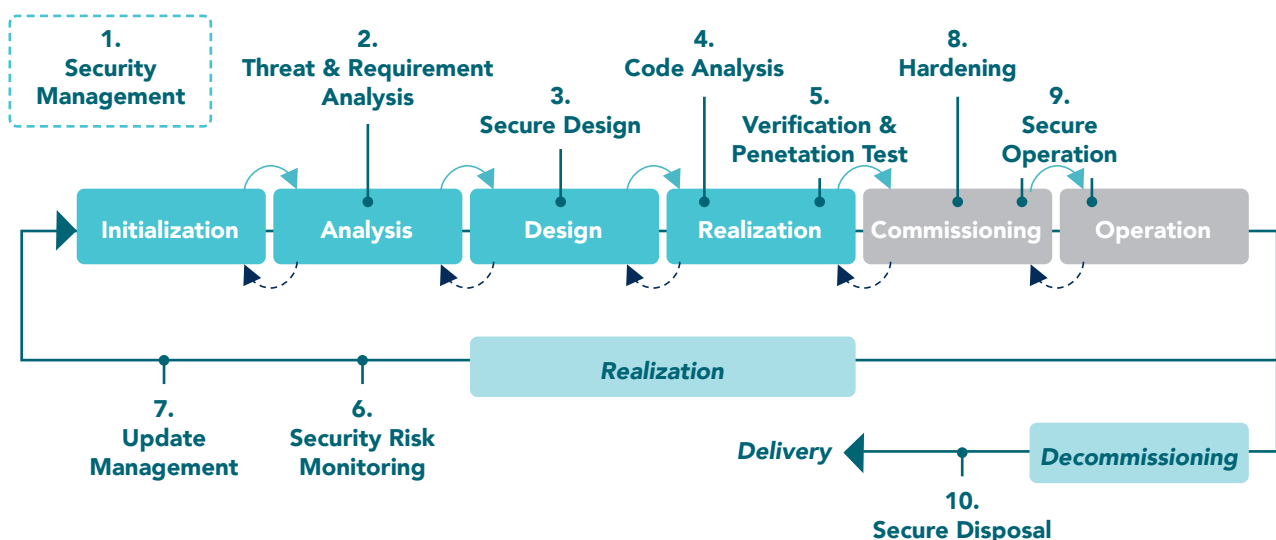

Complete partner in the whole lifecycle of embedded products. Development and maintenance with industrial Cyber Security compliance – IEC 62443.

Prevas is handling and facilitating the following during development and maintenance:

1. Security Management of development and maintenance
2. Threat and Requirement Analysis with gap-analysis
3. Secure Design on both new designs and product updates
4. Code Analysis, in-depths reviews
5. Verification and Penetration Test. Internal pre-audit and facilitating of capable partners after pre-audit.

Continuous cooperation with our customers operations team:

6. Security Risk Monitoring with daily product specific CVE updates
7. Update Management, road-mapping and security mitigation
8. Hardening, continuous product and infrastructure hardening
9. Secure Operation, Certificate and user management
10. Secure Disposal, process and automation of memory cleaning and product disposal
